Electronic door lock secuENTRY BRIDGE

OPENING AND CLOSING
DOORS, NO MATTER
WHERE YOU ARE.

Smart door opening taken to a new level. Enjoy your freedom
and control your secuENTRY door lock remotely!

At a glance!

secuENTRY BRIDGE

Your door lock has never been so smart! Opening your front door from wherever you are in the world is made easy with the secuENTRY BRIDGE from BURG-WÄCHTER. Simply by using a free smartphone app.

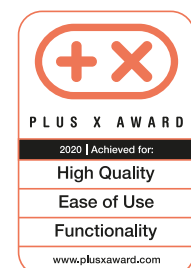

Your new found freedom: Open your door even when you're on the go. The next level of smart door opening has been achieved! Now you can conveniently control your electronic door lock from anywhere in the world with the secuENTRY Bridge and can admit visitors, children or workmen into the house. The perfect bridge between home WiFi and door lock!

Secure connection: encrypted Bluetooth signal.

How does it work? It's quite simple. Using the secuENTRY KeyApp you send the open door signal via smartphone to the secuENTRY BRIDGE. The BRIDGE integrated then your home WiFi then sends an encrypted and consequently secure Bluetooth signal to your secuENTRY door cylinder up to four meters away. Your guests can now open the door! The same applies, of course, to closing. You can check at any time when the door was opened.

Smart additional features: Locking authorisations assigned precisely to the minute.

The secuENTRY BRIDGE has many more smart features. This allows you to program time-limited codes for each door cylinder with one secuENTRY, e.g. for holiday homes. Before arrival, you inform your holiday guest of the six-digit code that is valid to the exact minute. The user simply enters the code on the secuENTRY keypad. The "handing over of the keys" has never been easier! The smart door intercom Door eGuard Video Bell DG8500 is the ideal complement. This allows you to see live who is ringing the doorbell and open your front door from a distance.

Outstanding technology:
The secuENTRY BRIDGE from BURG-WÄCHTER was awarded the PLUS X AWARD 2020 for high quality, convenience and functionality.

TIP!

Perfect partner: With the smart Door eGuard Video door intercom Bell allows you to see live who is ringing the bell and can open your front door remotely with the secuENTRY BRIDGE.

This discreet device offers unprecedented possibilities: The secuENTRY BRIDGE enables remote control of your secuENTRY door lock and consequently access for guests, children and service providers even when you are away.

Happy guests, happy landlord:
The secuENTRY BRIDGE enables you to "hand over the key remotely". As you simply and easily assign locking authorisations for holiday-makers to the exact minute. You can conveniently create the opening code at home.

Using the free secuENTRY KeyApp Open doors via smartphone.

The smartphone has been our constant companion for a long time now. Now, with the free secuENTRY KeyApp, it is also a key - and that for any number of secuENTRY door locks! The KeyApp for iOS and Android is available in the respective stores. However, the KeyApp can do more than just open and close doors. Using the app, the locking plan created with the secuENTRY PC software is simply transferred to the respective door cylinder.

As of now you will always have your front door with you!

Use the KeyApp to send a signal via smartphone to the secuENTRY BRIDGE. This forwards it to your secuENTRY door lock. The children, the delivery service or the guests at your front door can now open or close it easily and conveniently.

ALWAYS THE
SAFE CHOICE!
